PREFACE

It is my pleasure to announce the publication of the 11th volume of the “*Journal of Condensed Matter Nuclear Science*”. This new volume comprises eight papers of theoretical and experimental studies. The growing number of publications in the journal indicates that the field is becoming more and more active.

Again in this volume, I had to make a decision regarding a paper by Edmund Storms. The referee did not agree with the reviewer, therefore we decided to publish the paper along with the comments of the referee. I know that this is not a common way of including the comments of referee in scientific journals, but this field is very uncommon, and deserves an unusual openness to ideas and suggestions.
