## **Editorial**

It is always a great pleasure to publish a new volume of the *Journal of Condensed Matter Nuclear Science*. This is the combined effort of many authors, the reviewers, and the team doing the typesetting. While it does not compare the excitement of the birth of a new baby in a family, still it gives one the same feeling of boundless new possibilities. This new volume has both experimental and theoretical papers, which I hope will be of interest to readers. It is my hope that this journal contributes to the development of this new science, in spite of the many obstacles that we face.
