JOURNAL OF CONDENSED MATTER NUCLEAR SCIENCE

Volume 5

2011

CONTENTS

PREFACE

RESEARCH ARTICLES

- Modification of Pd–H₂ and Pd–D₂ Thin Films Processed by He–Ne Laser 1
V. Nassisi, G. Carettom, A. Lorusso, D. Manno, L. Famà, G. Buccolieri, A. Buccolieri and U. Mastromatteo
- Study on the Phenomenon Reported “Neutron Generation at Room Temperature in a Cylinder Packed with Titanium Shavings and Pressurized Deuterium Gas” 7
Takayoshi Asami
- Role of PdO Surface-coating in CMNE D(H)-Gas Loading Experiments 17
A. Takahashi, R. Seto, Y. Fujita, A. Kitamura, Y. Sasaki, Y. Miyoshi and A. Taniike
- Issues Related to Reproducibility in a CMNS Experiment 34
Jeff Driscoll, Mike Horton, Ludwik Kowalski and Pete Lohstreter
- Time-resolved Measurements of Loading Ratios and Heat Evolution in D₂ (and H₂)-Pd-Zr Mixed-oxide Systems 42
Akira Kitamura, Yuki Miyoshi, Hideyuki Sakoh, Akira Taniike, Akito Takahashi, Reiko Seto and Yushi Fujita
- Energy Exchange In The Lossy Spin-Boson Model 52
Peter L. Hagelstein and Irfan U. Chaudhary
- Dynamics in the Case of Coupled Degenerate States 72
Peter L. Hagelstein and Irfan U. Chaudhary
- Second-order Formulation and Scaling in the Lossy Spin–Boson Model 87
Peter L. Hagelstein and Irfan U. Chaudhary

Local Approximation for the Lossy Spin–boson Model <i>Peter L. Hagelstein and Irfan U. Chaudhary</i>	102
Coherent Energy Exchange in the Strong Coupling Limit of the Lossy Spin–Boson Model <i>Peter L. Hagelstein and Irfan U. Chaudhary</i>	116
Generalization of the Lossy Spin–Boson Model to Donor and Receiver Systems <i>Peter L. Hagelstein and Irfan U. Chaudhary</i>	140

PREFACE

I am very pleased to announce the publication of the fifth volume of the *Journal of Condensed Matter Nuclear Science*. The present volume comprises 11 papers and most of them being theoretical. I hope that in the near future more experimental papers will be available for publication.

After more than 22 years of international research in the field of Low-energy Nuclear Reactions (LENR), it seems that major breakthroughs are in view. The original work by Stan Pons and Martin Fleischmann considered the palladium–deuterium couple; however, it seems that the future relies on the much less expensive nickel–hydrogen system. If this is the case, then soon an unexpected breakthrough will occur.

The announcement on 23 March 1989 happened the day before the Exxon Valdez accident in Alaska. After Fukushima nuclear disaster in Japan on 11 March 2011, the long awaited Cold Fusion became successful for producing energy; finally, it has come in reality in our lives.
