>Dear All,1- Next

>Friday April 26 I will receive the report: as agreed with the 3rd  
>Independent Party I am entitled to read it before the pending  
>publication, even if I have not the right to ask for modification (  
>that had been foreseen because in case of a negative result I would  
>have needed the time to organize a defense). The report is very good, I  
>got confirmation. It will be registered and deposited in the Library of  
>the Swedish Academy of Science Friday 26, pending the publication in a  
>scientific magazine in May. Is an official document. I think it will  
>help ypour Investors.

>2- This morning I had a meeting with the Health

>Office of the Province of Ferrara, which has to authorize the 24 hours  
>test ( it is unthinkable to make it without authorization, we could be  
>stopped by the police upon a phone call due to the noise of the air  
>escape of the condensers, because we must dissipate the energy not  
>having any possible utilization for it ). We found an acceptable  
>solution.He explained to me that the Italian law "DPR ( Decreto del  
>Presidente della Repubblica) # 551- Dec. 21 1999 requests an  
>authorization for any plant that makes more than 35 kWh/h and this  
>authorization takes at least 6 months. But we are advantaged, because  
>LENR do not exist in the known technology, therefore when we say 35 kWh  
>we say kWh consumed, because plants that produce more than the energy  
>they consume "do not exist".Now,  $35 \times 6 = 210 \text{ kW}$ Therefore if we can  
>consume up to 35 kWh/h without authorization, this implies that in out  
>LENR case I can produce up to 210 kWh/h, which is a consistent amount

>of energy. I will steal something ( maybe the COP will be more). In  
>this case we do not need any authorization and the amount of power is  
>relevant and respects the fact to be consistent, as requested in the  
>Agreement. Same thing for the Hot Cats. I will activate only 1/4 of  
>the reactors, and I think it will not be a problem, since if 1/4 of the  
>reactors work, there is no reason that the other won't work ( unless  
>they have mechanical things to repair, but the issue is not there).

>

>Warmest Regards,Andrea
