**Subject:** Ecat final documentation

Dear JT (and Dear Tom who reads us in copy),  
finally after a year of stress I have slept a full weekend (YEAAAAHHHH)

I wanted to let you know the schedule of how to proceed for the next days.

First step: Condensation of digital data for not distracting precise analysis.  
At the end I will send you a excel file with all electrical and thermal data of the system throughout the period test.  
This step will keep me busy until approximately the first week of March 2016.

Then I will work on my official report to bring to light all the flaws and functional deficiencies of the system in order to have sufficient information to replicate a system with lower costs and with greater reliability.

In that report, the plant stop periods (total or partial) will be also mentioned and the reasons therefor.

This phase will use my time to the end of March 2016.

At the same time I believe it is appropriate to clarify if you are interested in the continuation of our counseling relationship maybe exchanging a draft of a contract renewal.

I am convinced that we will be able to find a point of mutual interest and useful to meet together the future development of the project.

Best regards,  
M.Eng. Fulvio Fabiani
