Exhibit B
DECLARATION OF UZI SHAYA

I, Uzi Shaya, declare as follows:

1. I submit this Declaration in response to the March 3, 2017 Declaration of Giuseppe Levi (the "Levi Declaration"). The Levi Declaration refers to a report entitled "Observation of Abundant Heat Production From a Reactor Device and of Isotopic Changes in the Fuel," published on October 6, 2014 (the "Lugano Report").

2. I am a citizen of Israel, and I was retained by attorney Schneor Z. (Zalli) Jaffe to assist Mr. Jaffe with his legal advice to Thomas Darden ("Darden"). In connection with that work, I met several times with Dr. Levi.

3. I never discussed with Dr. Levi any litigation anywhere, or the subject of him testifying in any legal proceeding anywhere. I never discussed with Dr. Levi the United States litigation involving Andrea Rossi ("Rossi") and Darden.

4. I never offered to pay Dr. Levi to recant or withdraw his support for the Lugano Report. I never discussed payment to Dr. Levi for any scientific work other than prospective work that he said that he was willing and wanted to perform. I never threatened Dr. Levi directly or indirectly.
5. I have read the Levi Declaration. As can be seen from various correspondence that he sent me, Dr. Levi very much wanted to proceed meeting with me, he asked to meet with me, and very much wanted to meet the clients. I never mentioned the identity of any client, and of course, neither directly or indirectly did I mention any legal proceedings. Copies of correspondence sent by Dr. Levi to me are attached to this declaration.

6. Dr. Levi's insinuation that he felt pressured is utterly uncalled for. He wanted to proceed negotiating with me, he was interested in cooperating with me. It was I who told Dr. Levi that my clients do not wish to proceed. Notwithstanding this notice, he did ask to meet me again.

I declare under penalty of perjury under the laws of the United States of America that the foregoing is true and correct.

Executed this _______ day of March, 2017.

Uzi Shaya
Any news? You had told me that a decision was done late last week.

Yes there are. I’m on vacation will return end of the week and will talk.

Hello how is your vacation? Any news? Shanà Tovà!

Hi shana Tova and hatime. I postponed my arrival to the end of nxt week. Chag sameach

Chag Sameach! Ok👍 let me know.

Hello any news? Shabat Shalom!

Yes most probably will be in Rome this coming Wednesday Shabbat shalom
Shabbat Shalom! Hear you on Sunday.

Shabbat shalom

Hi can we meet next Monday the 25.7?

Shabat Shalom, any news?

Yes we will meet in Rome 27,7 at 13 will let you know where latter hope it's ok Shabbat shalom

Good morning pls confirm the date and time

ok but where?

We will meet at 13 in the lobby
Hi

We're still looking into the legal issues due to the fact that you have conflict of interest here there might be a problem here for us. But we're looking into possible projects that don't involve the Rossi project. Sorry it takes time.

Shabbat shalom

Shalom professor
We have some developments. Let me know when I can call you.

come next week?

I don't know yet will know Sunday.

Shabbat Shalom! Hear you on Sunday.

Dear Uzi, ShavuaTov,
as I have told you probably one good solution for you and your investors is to
have a group of consultants instead of one.
In the LENR field because of the high economical interest many researchers are
connected in some way to companies, or has submitted patent applications and
is quite difficult to fine a single person that is expert of the field AND
completely neutral.
Here are some names:
First of all the Nobel Laureate
Brian Josephson <bdjl0@cam.ac.uk>
He is a very clever and nice person, and I have been in contact with him up to
2013.
Also I can recommend to you my Swedish colleague
Bo Hoistad, bo.hoistad@physics.uu.se but be
informed that he is in strict contact with Volvo (trucks) and others trying to
replicate LENR reactions in Uppsala.

Also from MIT:
Peter L. Hagelstein, I have not been in contact with him directly but we all
appreciate his work in our group.

Alexander Parkhomov (Moscow) alexparh@mail.ru Which
was the first to replicate the Lugano reactor ( I have met him personally ).

Vittorio Violante (Enea, Italy) who is a very fine experimentalist. I have
met him on Skype.
Note that he is probably already in contact with some industrial group (even
one in Israel as far as I know).

This are just few names in the field. I think we can start from those names to
form a group of experts in which each one could be biased in some way but have
the TOTAL sum of bias very near zero.
I would be glad if I can help you in any way.
No problem.

I will try to phone you this week.

Giuseppe.
