Editorial

I am very proud of this new edition of the *Journal of Condensed Matter Nuclear Science*. This is proof of the increasing activity going on in this field. After years of denial by the scientific community, more and more scientists are now involved. There is still a long way to go, but we are on the right track. In this edition, we present both theoretical and experimental papers, which are important for this area of research to progress.

Sincerely,

Dr. Jean-Paul Biberian
