CONTENTS

EDITORIAL

RESEARCH ARTICLES

Attempted Replication of Excess Heat in the Letts Dual-laser Experiment
Mason J. Guffey, Yang Tang and P.J. King 1

Optical Detection of Phonon Gain Distinguishes an Active Cold Fusion/LANR component (3)
Mitchell R. Swartz 29

Models for the Phase Diagram of Palladium Hydride Including O-site and T-site Occupation
Peter L. Hagelstein 54

Anomalous Energy Produced by PdD
Edmund Storms 81

How Basic Behavior of LENR can Guide. A Search for an Explanation
Edmund Storms 100

Quantum Composites: A Review, and New Results for Models for Condensed Matter Nuclear Science
P.L. Hagelstein 139
Editorial

I am very proud of this new edition of the *Journal of Condensed Matter Nuclear Science*. This is proof of the increasing activity going on in this field. After years of denial by the scientific community, more and more scientists are now involved. There is still a long way to go, but we are on the right track. In this edition, we present both theoretical and experimental papers, which are important for this area of research to progress.

Sincerely,

Dr. Jean-Paul Biberian
