JOURNAL OF CONDENSED MATTER NUCLEAR SCIENCE

Volume 22

2017

CONTENTS

PREFACE

RESEARCH ARTICLES

- CR-39 Detector Track Characterization in Experiments with Pd/D Co-deposition 1
Andriy Savrasov, Viktor Prokopenko and Eugene Andreev
- Basic Design Considerations for Industrial LENR Reactors 7
Jacques Ruer
- On Plausible Role of Classical Electromagnetic Theory and Submicroscopic Physics to understand and Enhance Low Energy Nuclear Reaction: A Preliminary Review 27
Victor Christianito, Yunita Umniyati and Volodymyr Krasnoholovets
- Oscillating Excess Power Gain and Magnetic Domains in NANOR[®]-type CF/LANR Components 35
Mitchell R. Swartz
- Development of a Cold Fusion Science and Engineering Course 47
Gayle M. Verner, Mitchell R. Swartz and Peter L. Hagelstein
- Probabilistic Models for Beam, Spot, and Line Emission for Collimated X-ray Emission in the Karabut Experiment 53
Peter L. Hagelstein

Preface

This Volume 22 marks the tenth anniversary of the publication of the first volume of the *Journal of Condensed Matter Nuclear Science*. This journal was created to fill a void in the scientific world. Since the beginning, in 1989, the subject of Cold Fusion, discovered by Martin Fleischmann and Stanley Pons, has been, and is still, rejected by the scientific community. There was a need to go beyond the International Conferences on Cold Fusion proceedings to publish papers. It was necessary to have an internal way of communicating between scientists working together, just like in any other field of science. From the very start, it was decided that the journal would be peer reviewed. Also, since ICCF16, the Journal publishes the proceedings of the conferences and workshops dedicated to Condensed Matter Nuclear Science. A total of 312 papers have been published, 93 of them being conference proceedings.

I would like to thank all the anonymous referees those who have spent lot of time and effort to make the papers of high quality. I have been pleasantly surprised to find that some of them do such a great job in improving the papers, they almost deserve to be listed as co-authors! I would like to thank Jed Rothwell for the great work which he is doing to improve the quality of the English of papers written by non-English speaking authors. It is also a pleasure to thank our Indian colleague Dr. Kumar who is doing an excellent job in the typesetting of the papers.

Please enjoy in reading this new volume.

Sincerely,

Dr. Jean-Paul Biberian
(*Editor-in-Chief*)
