CONTENTS

PREFACE

RESEARCH ARTICLES

- | | |
|---|-----|
| Observation of Excess Heat by Activated Metal and Deuterium Gas
<i>Tadahiko Mizuno</i> | 1 |
| Quasiparticles, Collective Excitations and Higher-order Collective Quasi-excitations in Lattice Assisted Nuclear Reactions
<i>Mitchell R. Swartz</i> | 26 |
| Concerning the Problem of Searching for the Optimal Palladium Cathode
<i>M. Tsirlin</i> | 56 |
| Binuclear Atoms: A Model to Explain Low Energy Nuclear Reactions
<i>Paolo Accomazzi</i> | 68 |
| The Electron and Occam's Razor
<i>Francesco Celani, Antonino Oscar Di Tommaso and Giorgio Vassallo</i> | 76 |
| Maxwell's Equations and Occam's Razor
<i>Francesco Celani, Antonino Oscar Di Tommaso and Giorgio Vassallo</i> | 100 |
| Cooperative Internal Conversion Process
<i>Péter Kálmán and Tamás Keszthelyi</i> | 129 |
| Recoil Assisted Low Energy Nuclear Reactions
<i>Péter Kálmán and Tamás Keszthelyi</i> | 142 |

Exothermic Reactions in the Partially Molten Li–Ni–Cu Alloy <i>Andras Kovacs, David Brown and Fredrik Ek</i>	159
Hydrogen–lithium Low Energy Resonant Electron-capture and Bethe’s Solar Energy Model <i>Xing Z. Li, Zhan M. Dong, Chang L. Liang, Yun P. Fu, Bin Liu, Gui S. Huang, Shu X. Zheng and Si Chen</i>	181

Preface

Science moves on two legs: experiments and theory. Sometimes theory comes first, but most of the times it is the reverse. In this realm of Condensed Matter Nuclear Science, the well-known theories of nuclear reactions do not explain the experimental observations. One option is to say that experiments are faulty. This is the easiest way to comment. We know that experiments performed by tens of different experimentalists with many different techniques have shown anomalies. They have proven the existence of excess heat, production of helium-4, helium-3, tritium, neutrons, transmutations, and strange radiation. This first option cannot be accepted. The second option remains. We have entered a new field of science, and a lot needs to be done before a valid theory can be developed. We need many more experimental facts, so that a full picture of Low Energy Nuclear Science can be understood, and also developed for the benefit of mankind.

Volume 25 is another contribution to our understanding of Condensed Matter Nuclear Science.

Sincerely,

Dr. Jean-Paul Biberian
